

Corporate Overview – CanadaDrugs.com

CanadaDrugs.com is the leading mail-order Canadian pharmacy in patient safety. Under strict quality assurance measures, every step is taken to ensure the safety and accuracy of each prescription ("Rx") order.

Starting with a pharmacist reviewing each prescription ("Rx"), concerns of order accuracy or possible reactions result in contacting the patient's physician for verification. Further assurance is provided by having three pharmacists review every prescription at different stages throughout the processing of each order.

Carrying the same brand name and generic prescription products you would find in your local pharmacy, quality and reliability is provided by delivering prescriptions in tamper proof packaging.

CanadaDrugs.com is helping to shape the industry's future through their commitment to patient safety by meeting or exceeding all standards set by organizations such as MIPA, CIPA, and being the first pharmacy accredited by US-based IMPAC.

Headquartered in Winnipeg, Manitoba, CanadaDrugs.com operates from their 24,000 square foot pharmacy and distribution centre. They employ over 250 staff, including 15 licensed pharmacists, and have filled over 1,000,000 prescriptions since 2001.
